

# CRYSTAL CLARITY

---

## Module 5 - Charting Your Course

Hey there! Welcome to Module 5 – charting your course.

This is all about defining the strategies to get you from where you are to where you want to be.

I hope you've been doing the exercises from the previous modules otherwise you will not achieve the clarity that you came here for. It would be waste to pay for the course and due to your lack of effort still not derive the benefits from it.

In Module 3, we talked a little bit about your vision, but we didn't go into it in detail. We're going to that now. Here is your first exercise in this module.

---

### Do Exercise 2

---

Great! How did you do on that? I know you did well BUT...

If you found it a little difficult don't worry. You can take your time to think about it carefully and complete. You've already paid for the course so you can login anytime and continue where you left off. There's no expiry date. As my mentor likes to tell me, Karlene, give yourself some grace! So, I'm telling you now to give yourself some grace. Take it easy on your mind and brain and think things through methodically.

When you have completed that exercise start thinking about what you would need to accomplish it. You can start writing the steps down but if you get stuck again, right here is the perfect place to book your strategy call with me so that we can work through it one-on-one.

As you write out the steps, think priority. Especially for those of you who are multi-talented like me. You often hear people say you can't have everything or you can't do everything. Well, let's unpack the can't and say this affirmation:

***I CAN DO ALL THINGS THROUGH CHRIST WHO STRENGTHENS ME!***

Yes, you can!

However, the key is prioritization. What comes first?

What's most important to get you from point A to point B?

Which of your projects takes precedence? Why?

In business it's always good to start with the low hanging fruit – those things that are most easily achievable. Do those and get them out of the way before you start tackling the bigger, more complicated things. When you start those things think of the adage, how do you eat an elephant?

Answer: One bite at a time.

Pace yourself and be patient with yourself. Rome wasn't built in a day. You will not reap the harvest a day after you plant the seeds. Things take time to develop. Your responsibility is to get ready and stay ready. Preparation is key, so that when opportunity shows up, you're there to reap the rewards.

So make sure your plan is solid.

Again, **book your [strategy call](#)** with me if you need some one-on-one time. You're almost there. See you in the next module.
